3 Junior Software Engineer Positions

NovaMechanics Ltd. is on the lookout for passionate and motivated individuals to join our team (Larnaca, Cyprus or Athens, Greece). We're currently searching for innovative Junior Software Engineers with a deep understanding of software development, an unending curiosity, and a desire to dive into the complexities of technology.

Position: Junior Software Engineer Location: NovaMechanics (Cyprus and Greece) (On site and Hybrid Opportunities Available)

Key Responsibilities:

1. Collaborating with our talented team to design, develop, and maintain software applications
2. Assisting in debugging, troubleshooting, and improving existing software
3. Participating in code reviews to maintain high-quality code
4. Engaging in continuous learning to stay updated with emerging technologies and programming languages
5. Contributing to the development of detailed documentation for usability and maintenance

Qualifications:

1. A degree in Computer Science, Software Engineering, or related field
2. Familiarity with one or more programming languages such as Python, Java, or C++
3. Understanding of object-oriented programming, data structures, and algorithms
4. Experience with web development technologies (HTML, CSS, JavaScript) is a plus
5. Knowledge of version control systems (Git, SVN)
6. Strong problem-solving skills, creativity, and a keen eye for detail

What we offer:

- Competitive salary and benefits
- Opportunities for professional growth and advancement
- Dynamic, inclusive, and collaborative working environment
- Regular training and learning opportunities
- Chance to work with cutting-edge technologies

Interested applicants, please send your resume, along with a brief cover letter to hr[at] novamechanics[dot]com until **31/8/2023** (ref **SoftEng Aug 2023**)
